

The diagram illustrates a 2D CNN architecture. The input is a large image of size 6,104 by 11,859. This input is processed through a series of convolutional layers. The top row of feature maps has dimensions 928, 2,000, 2,000, 2,000, 2,000, and 931. The bottom row of feature maps has dimensions 928, 2,000, 2,000, 2,000, 2,000, and 931. The input image is divided into a 5,873 x 6,104 region and a 928 x 931 region. The bottom row of feature maps is labeled with 'a' and 'b' dimensions.
